

Airline Missing Name Format Guide

Different airlines handle passports that carry only one name — or a missing first name or surname — in different ways. This table shows how the name should be entered in the booking for each airline so the ticket matches the travel document.

FNU — First Name Unknown. Entered in the given-name field when the passport shows no first name.

LNU — Last Name Unknown. Entered in the surname field when the passport shows no surname.

Blank — leave the field empty. **Split the name** — divide the single name across both fields.

Important: This information is published as general guidance and may be changed by an airline without notice. Please verify the name format before ticketing — particularly on codeshare flights. For U.A.E. bookings, check the latest airline circular before issuing the ticket. Soul Paradise Travels accepts no liability for any discrepancy. If you are unsure, contact us at soulparadisetravels.com and we will confirm it with the airline for you.
